

Understanding Disease and Overcoming Disease

What is disease and how does disease come about?

“Disease is an effort of nature to free the system from conditions that result from a violation of the laws of health.”
{The Ministry of Healing, p. 127}

“Nature bears much abuse without apparent resistance; she then arouses and makes a determined effort to remove the effects of the ill-treatment she has suffered. Her effort to correct these conditions is often manifest in fever and various other forms of sickness.”{The Ministry of Healing 234}

In Proverbs 26:2 we read, “...the curse causeless shall not come.”

“Disease never comes without a cause. The way is prepared, and disease invited, by disregard of the laws of health.” {The Ministry of Healing 234}

What are the necessary steps that must be taken to overcome disease?

“In case of sickness, (1) the cause should be ascertained. (2) Unhealthful conditions should be changed, (3) wrong habits corrected. (4) Then nature is to be assisted in her effort to expel impurities and to re-establish right conditions in the system.” {The Ministry of Healing, p. 127}

“The first thing to be done is to ascertain the true character of the sickness and then go to work intelligently to remove the cause.” {The Ministry of Healing 235}

“...The cause which I knew not I searched out.” Job 29:16
